

# TEMP Connector

THE CLEVER SOLUTION FOR THE  
TEMPORARY USE OF POINT-OF-USE WATER FILTERS

Quick and reliable measures are essential in the **event of a positive microbiological result** in a drinking water sample. In order to **maintain everyday hospital operations**

- ▶ a **safe water supply** must be guaranteed at all times
- ▶ restrictions on use should be avoided as far as possible.

Point-of-Use water filters provide a **proven emergency relief** at the Point-of-Care until the underlying problem has been identified and a safe and permanent solution has been found.

With the **i3 TEMP Connector**, we provide an **innovative and cost-effective alternative** for connecting water filters to the tap. The plastic coupling, specially developed for short-term use, **can be used for up to 150 days**. This corresponds to three filter change cycles.

**The TEMP Connector is your flexible and cost-effective solution for immediate action in a critical situation.**

Low initial costs  
compared to common  
alternatives

Maximum  
duration of use  
150 days

### M24 M TEMP Connector ONE (nAS)

Art. No. S206025

### M22 F TEMP Connector ONE (nAS)

Art. No. S206026

Quick-release coupling for installing an i3 ONE Point-of-Use water filter on a tap with an M24x1 (55/64"-27) female thread or M22x1 (13/16"-24) male thread

The TEMP Connector enables the safe and cost-effective use of Point-of-Use water filters and is the ideal temporary solution until a permanent solution to the bacterial infestation has been implemented.

## Choose safety and efficiency – with the i3 TEMP Connector.

Wondering about **which is the right thread?** Do you need tips on **how to correctly measure a thread?**

You can find this and other useful information clearly explained in our **Couplings and more** section.
